Patent No. 8,615,906

Three tools in one! Pengo provides yet another solution for your drilling needs. The rugged hard-faced combo bucket features a patented scissor latch and CAM activated release system. Located in the vent, the double-finger latch system (on buckets 36" dia. and larger) stays protected from the drilling spoils, thus allowing the scissor to function without any interference. Note: Buckets from 24" to 36" are single-finger latch, and are not projected like the double-finger latch.

The double open bottom design allows the operator to open the bottom plate either manually or automatically.

The bottoms are available for clean-out, dirt drilling and rock drilling. The dirt head features the patented TriFlow® pilot and the rock head features the Strata® drilling grade conical teeth.

Standard Overall Length: approx. 48"
(varies depending on hub selection)
Wall: 3/4" thick
Standard Diameters Available: 18", 24", 30",
36", 42", 48", 54", 60", 66", 72", 84", & 96"

REORDER PARTS:

**C31-HD
2.5" Stem**
135913
2.5 Pin/Washer
30 lbs.

SR-100 Tooth
850201
38.5 lbs.
bucket qty. 35

S-31HD Tooth
850210
38.5 lbs.
bucket qty. 35

S-31 Tooth
850208
37 lbs.
bucket qty. 35

P-30 Holder
850224
31.2 lbs.
bucket qty. 12

The above tooth and holder part numbers are for buckets not each tooth (unless noted).
When ordering buckets you may use these numbers. If applicable, pallet numbers are listed on page 12.

**TF-1000
2.5" Stem**
137348
43 lbs.

2.5 Adapter
151598
4.3 lbs.
use with both pilots

201 Tooth
170030
2.1 lbs.
bucket qty. 20

211 Tooth
170034
3.5 lbs.
bucket qty. 20

WO-8 Holder
171577
5.3 lbs.
