31.2 lbs.  
bucket qty. 12

**P-4 Holder**  
850225  
29.2 lbs.  
bucket qty. 8

New to the Pengo Foundation Tooling product line is the Heavy-Duty Core Barrel. A standard feature to the HD Core Barrel is a heavy-duty top plate with full length gussets and a 1 1/4" thick core ring.

The addition of the top plate sets this apart from the standard barrel as it can withstand more crowd force, and with the help of the thick core ring, power through the toughest drilling conditions.
