STRATA
DRILLING GRADE CARBIDE

Flight Section Overall Lengths: 5', 10' & 20'
Lead Section Overall Length: 5'
Standard Flight Thickness: 5/16"
OD: 3 1/2" OD x .300" Wall
Diameters Available: 16" to 48"

This addition to the excavator line of augers to be compatible was built to be compatible with the larger Revolution Series drilling drives. This auger system allows you to "build your own" auger by selecting the flight length and either a rock or dirt lead.

The rock lead is built with Strata® drilling grade carbide teeth which provide superior wear in tough drilling conditions.

The dirt lead is built with the patented TriFlow pilot bit and Pengo's own Fas-N-Lok dirt teeth.

When looking for the complete excavator auger and drive package, select Pengo.

Note: For use with the Revolution DV-30.

CARRIER GUIDE:

The above conical tooth part numbers are for buckets not each. When ordering buckets you may use these numbers.

Images not to scale.

STANDARD AUGERS LISTED ABOVE - Special Center Shafts and Custom Orders Available.
Custom orders cannot be canceled and are non-returnable.
