

ITEM	LBS.	PART NO.
SAT-85	17	157533

The SAT-85 Screw Anchor Tool has recently been redesigned to better fit your application. This one-piece unit is used for installing anchors without having to remove the auger.

This tool works in conjunction with any Pengo MD auger that is using the FH-205 pilot. Just slip the SAT-85 tool over the end of the FH-205 pilot and you are ready to install anchors.

NOTE: The SAT-85 is for use ONLY in installation applications, never for removal. Failure to meet these precautions may cause safety hazards.

## ALL NEW DESIGN

Complete with U-Shaped bolt to secure SAT-85 in place.

The NEW SAT-85 allows you to fit the tool over the FH-205 pilot.
